SUBJECT: Contractual and Industrial Security Oversight

The DDA has been tasked, by the DDCI in Reference (c), to monitor implementation progress and has further delegated the assignment to the D/L. The D/L has established a reporting mechanism which involves focal point officers in those components tasked with various recommendations. These focal point officers provide weekly input on Tuesdays to [REDACTED] Chief of my Procurement Management Staff. His address is [REDACTED].

3. (S) Staff Position:

25X1A

The Offices of Security and Communications have already appointed focal point officers and have been reporting. They need only note any new direction in Reference (d) and include progress on this new direction in their weekly reports.

The Offices of Training and Finance were not tasked in Reference (c) and have not been a part of our reporting cycle. These offices are tasked by Reference (d) and accordingly are asked to appoint focal point officers and report progress in the format of the attached progress report to [REDACTED] weekly. Copies of the weekly progress report, for the period ending 11 July 1978, are provided for informational purposes.

25X1A

Recommendation #13 of Reference (a) is that the "Project Officer in the Contract Cycle" course be continued with emphasis on the specific role of the contracting officer, the auditor, the security officer, and the technical representative with respect to industrial security. OTR, OS, OL, and DDS&T are assigned responsibility, with OTR designated as having primary responsibility. Any background information on Task Force activity needed by OTR will be made available by [REDACTED] upon request.

25X1A

We note that some reporting has been by phone rather than in writing, and that some of the written reporting has not been in the required format. This causes us difficulty in preparing our report to the DDA, and may result in our incorrectly reporting your information. Your help in this regard is solicited.
